

Subject: entry into force of Regulation (EU) 2023/988 / New General Product Safety Regulation (GSPR)

Dear Customer,

with reference to the above-mentioned regulation, which will enter into force on December 13th, 2024, we would like to provide you with some information regarding the compliance of our products:

- All our globes are already identified by their model (GLOBUS LED or GLOBUS-5V), allowing consumers to identify the product from a technical perspective and ensuring its traceability to all technical documentation (technical file, declaration of conformity, and TÜV-GS certificate) - (Art. 9 para. 5).
- All our globes report in their packaging and instructions the manufacturer's name, postal address, and our website address (Art. 9 para. 6).
- The instruction provide all the necessary information for the safe use of the product, as well as the website address www.tecnodidattica.it and an email address through which consumers can submit complaints or report any incident or safety issue they may have experienced with the product (Art. 9 para. 11).
- The technical documentation required by Art. 9 para. 2 of the regulation is kept up to date and is available to market surveillance authorities at the manufacturer's premises (TECNODIDATTICA S.p.A).

We believe that our products are compliant with the new regulation, a compliance confirmed through verifications carried out with the certification body for our product. Our quality assurance department is monitoring the development of the regulation in collaboration with TÜV-SÜD, as guidelines are expected to be issued soon to aid in the interpretation of all aspects related to the new legislation.

We remain available for further clarification and to assist you in interpreting the new regulation.

Moreno Mojana
QA Manager
TECNODIDATTICA S.p.A.
